

Paul Ramotar

I sought employment at Name Health Center as nursing assistant primarily for economic reasons. I immediately realized the rewards and satisfaction from caring for elderly. Nursing offered me an opportunity to be both compensated financially and at the same time provided me with the satisfaction of caring for elderly patients.

Surprisingly, I felt I have impacted my profession as practical nurse as I continuously strive to provide the very best of cares compassion and the knowledge as I care for my patients. shortly after one of my patients expired , a family member summoned to meet with me. This patient's daughter handed me over a check for \$ 9,000; the family was emphatic that I impacted and impressed them that they wanted to show their gratitude. I knew for one I could not accept such a gift however I received the glory and happiness in me knowing I did accomplish my goal of attaining.

I initiated changes to have nursing assistants work in a buddy system to insure scrutiny. I advocated further education for staff from my employers and I ensured that I increased my since of awareness for all residents under my care.
